

Environmental Policy

according to standard UNE-EN-ISO 14001:2015

For **Noxium's** management it is a fundamental objective to minimize the impact that its activity may have as negative for the Environment, it is therefore a commitment to ensure that this Environmental Policy and its Objectives are known by all stakeholders (employees, customers and suppliers) and that they are allowed to receive the information and knowledge necessary to be fully aware of the environmental aspects that affect the organization and society in general.

The following are considered Environmental Quality Objectives:

- To comply with the legal and regulatory provisions in force and other requirements, which apply to the activities in environmental matters.
- To define a set of impact indexes and improve them as a goal for the minimization of harmful environmental repercussions, configuring a system committed to the continuous improvement of the environment.
- To carry out a correct and optimal selection of resources committed to nature, reducing energy consumption, and trying as far as possible to ensure that these resources are renewable and non-polluting.
- To carry out information, promotion and training activities on this Environmental Policy in order to achieve a balanced shared commitment to the objectives of protecting the environment and conserving natural resources in the long term.
- Comply with those initiatives that we voluntarily subscribe to as relevant to our environmental commitment.

The General Management will ensure that all necessary means are in place to ensure the application of the Environmental Policy in all areas of the company.

General Management

Antonio Corral
CEO
